results, review Prentice Hall Biology, Chapter 25. You may take the test as many times as you like.

Stresses Adaptation in Plants and Animals (With Diagram)

Many plants have impenetrable barriers, such as bark and waxy cuticles, or adaptations, such as thorns and spines, to protect them from pathogens. If pathogens breach a plant's barriers, the plant can respond with secondary metabolites, which are often toxic compounds, such as glycol cyanide, that may harm the pathogen.
